The waters off the Bay Islands of Honduras boast the second largest barrier reef in the world and hosts hundreds of fish and coral species. The 80°F water offers something for every diver whether you prefer shallow reefs, seemingly bottomless walls, or the intrigue of old wrecks. Visibility typically ranges from 80-100+ feet year round making it easy to take in the vibrant underwater sites. After a day of world-class diving, return to Anthony's Key all-inclusive resort to relax, explore or experience what else Roatan has to offer. New and seasoned divers, or any experience level in-between are welcome!
